Kodungallur, Thrissur, Kerala

B.Tech graduate in Electronics and Communication Engineering with professional experience as a Technical Business Analysis Engineer, specializing in testing, SQL, and data analysis. Developed a strong interest in backend development while working closely with software systems, leading to hands-on experience in Java, Spring Boot, and REST APIs through real-world projects. Actively upskilling to transition into a software engineering role with a focus on building scalable and efficient backend systems.

SKILLS

- Java, Python, SQL, Mongo DB, Embedded C
- JDBC, Hibernate, Jackson, J Unit, Spring-Boot, Spring Data
- HTML, CSS, JavaScript, Gradle, Mockito, Git, Docker
- React J S, Design Patterns, Linux, Manual Testing, Postman
- Microsoft Dynamics 365(Power Apps, Power Pages, Power Bi)
- Microcontrollers Known: Arduino, Raspberry PI

WORK EXPERIENCE

Technical Business Analysis Engineer I, In Conduent Business Services India LLP **Sept/24 - Present**

- As a Technical Business Analysis Engineer I, I specialize in application testing, including unit testing, regression testing, and XML testing, to ensure robust and reliable systems. My role involves analyzing business requirement documents to identify key objectives and translating them into comprehensive test plans. Additionally, I leverage my expertise in PL/SQL to write complex queries and perform backend updates

INTERNSHIPS

Internship in Spring Boot Backend Development, *by* ***Crio.do*** **June/25 – Present**

- Completed a hands-on software development internship focused on building production-grade backend applications using Java and Spring Boot. During the internship, developed real-world projects such as XMeme, QEats, and QMoney, implementing RESTful APIs and integrating databases like MongoDB along with external services. Applied object-oriented programming principles, SOLID design principles, and design patterns to create scalable and maintainable systems. Gained practical experience in writing unit tests, debugging issues, optimizing performance, and following clean code practices to ensure high-quality software development.

Internship in Microsoft Dynamics 365 Development, *by* ***Macrosive Computer Solutions*** **April/24 – July/24**

- Intern at Macrosive, where I worked with software development team and Gained hands-on experience with Microsoft Dynamics and related technologies including Power Apps, Power Automate, and Power Pages etc. Tested various products to ensure quality and performance. Developed a Work-from-Home Request page using Power Apps as part of an internal project, enhancing the efficiency of remote work requests

Internship in Java and Python Full Stack Development, *by* ***KODNEST*** **July/23 – March/24**

- Intern at KodNest, where I acquired practical skills in Java, Python, MySQL, Frontend Technology, Manual Testing, contributing to real-world projects and learning directly from industry professionals

PROJECTS

XMeme | Backend Web Application *(Jan 2026) | Link*

- Developed a backend web application enabling users to post and view memes by implementing REST APIs using Spring Boot.
- Integrated MongoDB for efficient data storage and retrieval.
- Designed and tested application functionality to ensure reliable performance.
- **Tech Stack:** Java, Spring Boot, MongoDB, REST APIs, JUnit

QEats | Food Ordering Backend System *(Jan 2026) | Link*

- Built backend components of a food ordering application using Spring Boot.
- Implemented multiple REST API endpoints to fetch restaurant data and process orders.
- Structured the application for scalability and efficient data handling.
- **Tech Stack:** Java, Spring Boot, REST, Jackson, Lombok, Junit

Xlido | Real-time Event Engagement Platform *(Nov 2025) | Link*

- Developed an audience engagement application enabling real-time interaction during events.
- Implemented Q&A features to facilitate seamless communication between users and organizers.
- Designed core functionalities to improve user participation and experience.
- **Tech Stack:** Java, OOP, SOLID Principles, API Development

QMoney | Stock Portfolio Analyzer *(Oct 2025) | Link*

- Implemented core portfolio management logic and packaged it as a reusable library.
- Refactored codebase to support multiple stock quote services.
- Enhanced application performance and stability through optimization.
- **Tech Stack:** Java, REST APIs, Jackson, Design Patterns, JUnit

---

EDUCATION

B. Tech, Electronics and Communication Engineering **2019 – 2023**

- Christ College of Engineering, Irinjalakuda - APJKTU
- CGPA – 7.39

Class XII - Kerala State Board **2017 -2018**

- P. Bhaskaran Smaraka GHSS, Kodungallur
- Percentage – 82.2%

Class X - Kerala State Board **2015 - 2016**

- St Annes HS, Kottapuram
- Percentage – 100%
