Kodungallur, Thrissur, Kerala

B. Tech graduate specialized in Electronics and Communication Engineering. Interested in embedded systems, Robotics and Software Development. I am Committed to continuous learning and skill enhancement, demonstrated through relevant internships aimed at honing technical proficiency and problem-solving abilities. Looking for a professional environment where I can contribute for the growth of the organization and upgrade my skills.

EDUCATION

B. Tech, Electronics and Communication Engineering **2019 – 2023**

- Christ College of Engineering, Irinjalakuda - APJKTU
- CGPA – 7.39

Class XII - Kerala State Board **2017 -2018**

- P. Bhaskaran Smaraka GHSS, Kodungallur
- Percentage – 82.2%

Class X - Kerala State Board **2015 - 2016**

- St Annes HS, Kottapuram
- Percentage – 100%

WORK EXPERIENCE

Technical Business Analysis Engineer I, In Conduent Business Services India LLP **Sept/24 - Present**

- As a Technical Business Analysis Engineer I, I specialize in application testing, including unit testing, regression testing, and XML testing, to ensure robust and reliable systems. My role involves analyzing business requirement documents to identify key objectives and translating them into comprehensive test plans. Additionally, I leverage my expertise in PL/SQL to write complex queries and perform backend updates

INTERNSHIPS & PROFESSIONAL TRAININGS

Internship in Microsoft Dynamics 365 Development, *by* ***Macrosive Computer Solutions*** **April/24 – July/24**

- Intern at Macrosive, where I worked with software development team and Gained hands-on experience with Microsoft Dynamics and related technologies including Power Apps, Power Automate, and Power Pages etc. Tested various products to ensure quality and performance. Developed a Work-from-Home Request page using Power Apps as part of an internal project, enhancing the efficiency of remote work requests

Internship in Java and Python Full Stack Development, *by* ***KODNEST*** **July/23 – March/24**

- Intern at KodNest, where I acquired practical skills in Java, Python, MySQL, Frontend Technology, Manual Testing, contributing to real-world projects and learning directly from industry professionals

PROJECTS

"Project To-do Manager Web Application" **2024**

- "Project To-do Manager Web Application" is a web app built with Spring Boot (backend) and React (frontend) for efficient task management. It enables users to create, edit, delete tasks, organize them into projects, and manage project details. Secure user authentication and authorization ensure controlled access to all functionalities.

"Music Web Application (Music Tune Hub)" **2024**

- "Music Tune Hub" is a music application developed with Spring Boot for the backend and HTML, CSS, Bootstrap, and Thymeleaf for the frontend. It features a user-friendly interface with distinct roles for users and administrators. Users can explore a vast library of songs, playlists, and purchase memberships for enhanced access.

"Quiz Application Using React" **2024**

- developed a dynamic and engaging Technical Quiz application using React.js, The user-friendly interface allows participants to select their preferred quiz category with dedicated buttons. The application incorporates real-time scoring and immediate feedback, enhancing the overall user experience

"Mass Monitoring Medcase" – *Final Year project* **2023**

- A device designed to remind patients to take medicine on time while automatically tracking the remaining pill count. It supports multiple individuals and their prescriptions, sends email notifications when refills are needed, and connects to a website for caretakers and doctors to monitor medication consumption..

"Accident detection and Driver safety" - *Sixth Semester Mini project* **May - July 2022**

- Developed using Raspberry Pi Board, the system will detect vehicle accidents and fetch the location details through and send to EMS or any assigned person. It also helps prevent accidents due to drunk-driving by turning off the engine if the presence of alcohol is detected upon a sensor.

"Automated agriculture maintenance system based on plant growth" **Jan - 2022**

- *"Hackatly"*, a 48 hours of state level hackathon conducted by IEDC CoE Thalasseri in association with KSUM**,** designed a device to monitor the growth of plants and nutrients. An automated irrigation system was designed to ensure optimum water availability for the plants.

SKILLS & INTERESTS

- **Skills:**
  - Java, JDBC, Hibernate,
  - HTML, CSS, JavaScript, SQL,
  - Embedded C, C++, Python programming
  - Spring-Boot, React J S, Java Microservices
  - Microsoft Dynamics 365(Power Apps, Power Pages, Power Bi)
  - Git Version Control, Manual Testing
  - Microcontrollers Known: Arduino, Raspberry PI
  - Proteus, Tinker cad, Postman, Docker, Kubernetes
- **Interests**
  - Robotics, Embedded Systems
  - Software Development

STRENGTHS

- Leadership
- Optimistic
- Adaptive
- Teamwork
